

Stream Asset Guide

WEBCAM

PNG asset. Place over your current webcam as an image source in OBS. There are 2 webcam options to choose from.

STREAM OVERLAYS

WebM / MP4 file asset (animated) or PNG file asset. Each file is a separate Scene for OBS. For Just Chatting we highly recommend using the WebM file to place over your webcam. To use these assets:

- 1) Create a new scene in OBS and name it according to the scene you are using.
- 2) Create a new Source and select Media Source and name it according to the scene you are using
- 3) Upload the WebM file under "Local File." Make sure you check mark ALL boxes on this page.
- 4) Repeat for each scene.
- 5) For the "Just Chatting" scene, BE SURE to place the WebM scene OVER your web cam. Scale your camera as needed.

*There are also static overlays as PNG files should you choose to not use the animated options.
