Just Chatting

WebM / MP4 file asset (animated) or PNG file asset. Each file is a seperate Scene for OBS. For Just Chatting we highly recommend using the WebM file to place over your webcam. To use these assets:

1) Create a new scene in OBS and name it according to the scene you are using.

2) Create a new Source and select Media Source and name it according to the scene you are using

3) Upload the WebM file under "Local File." Make sure you check mark ALL boxes on this page.

4) Repeat for each scene.

5) For the "Just Chatting" scene, BE SURE to place the WebM scene OVER your web cam. Scale your camera as needed.

*There are also static overlays as PNG files should you choose to not use the animated options.

Talking Points – General

◊ Chat, I'm beyond hyped to be teaming up with Quest to Conquer Cancer and The Princess Margaret to support an important cause that's close to my heart.

◊ Season 4 of the Quest to Conquer Cancer's Charity Marathon is here! I'm ready to do good. Are you guys prepared to join me on this Quest? Spam (emote) in chat if you are! Let's go!

◊ Not only are we raising funds for life-saving cancer research, but we're also spreading hope to those who need it the most.

◊ Your donations will go directly to the brilliant minds at The Princess Margaret who are pushing the boundaries of cancer research and care.

◊ By supporting The Princess Margaret and the Quest, our community can change the world. Can we get a (emote) in the chat for that??

◊ I must give a special shout out – to all of you! Every bit of support you've shown during this stream has gone straight to The Princess Margaret, supporting the advancement of life-saving cancer and care.

◊ It's amazing that our stream, and gaming in general, can be a force for good!"

◊ Remember, this is not just any event – it's a chance to make a real difference! So, spread the word, and show the world the power of our Twitch community!

Talking Points – Fundraising Dollars at Work

◊ Did you know that The Princess Margaret revolutionized the world's understanding of cancer?

◊ Back in 1963, two amazing scientists, Till and McCulloch from Princess Margaret Cancer Centre, made a ground-breaking discovery – the stem cell! This little cell has the power to renew and repair tissues in our bodies, and their work laid the foundation for regenerative medicine worldwide. So inspiring!

◊ Did you also know that The Princess Margaret also pioneered immunotherapy, a less-toxic alternative to chemo?

◊ In 1983, Dr. Tak Mak pulled off something amazing – he cloned the T-Cell Receptor! This ground-breaking discovery paved the way for safer and more effective cancer treatments through immunotherapy.

◊ In 2018, The Princess Margaret developed a blood test with the potential to save the world! Dr. Daniel De Carvalho and Dr. Scott Bratman developed a simple blood test that can detect various types of cancer before symptoms even appear!

◊ Did you know that The Princess Margaret is home to one of the world's largest clinical trials programs? They test therapies to benefit cancer patients around the world.

◊ The Princess Margaret is using A.I. to make real progress! Dr. Tom Purdie and his colleagues were the first in the world to harness artificial intelligence to improve radiation cancer therapy treatment planning, improving accuracy and outcomes for patients.

◊ The Princess Margaret uses futuristic tech to see cancer in a new light! Dr. Gang Zheng developed unique nanotechnology to make tumours glow, giving patients the potential to receive information in real-time on how their cancer is responding to treatment.

◊ Did you know that the world sends their best to learn from The Princess Margaret? They are training the next generation of global cancer leaders. Partnering with 500 leading cancer institutes in 107 countries, they are one of the world's largest hubs of cancer knowledge and talent!

◊ The Princess Margaret literally finds what cannot be seen. In 2014, Dr. John Dick discovered that some patients are pre-disposed to leukemia and cardiovascular diseases, helping to identify patients at risk of cancer and heart disease before patients even show symptoms of these illnesses.

Thank You
